This level chart gives an approximate guide to how long it may take a learner to complete levels. The chart assumes that each lesson is 3 hours long with 6 hours being studied in the classroom a week in the classroom with an additional 3 hours home study. The student should work hard, attend all lessons and complete all homework tasks. This is **not** a guarantee as all people are different and learning takes place at different rates.

* The gap between intermediate and advanced are more difficult to bridge. Some students will do it in the lower number of study hours but for some students it will take up to the higher amount. Remember this is a guide.
